BUILDING STATISTICS, TASMANIA - MARCH QUARTER, 1952.

The Deputy Commonwealth Statistician (Mr. J. C. Stephen), has made available the following particulars of Building Statistics for the quarter ended 31st March, 1952, together with comparable data for preceding periods.

1. DEFINITIONS OF TERMS USED.

A statement of definitions of terms used will be found on page 11.

2. SUMMARY FOR QUARTER ENDED 31ST MARCH, 1952.

Building statistics for March quarter, 1952, are summarised in the following table. Compared with the previous quarter, the figures indicate a marked decline in output and a consequential drop in employment. Measured in terms of values, the output for the quarter dropped by £754,000 or 24 per cent whilst the number of workers actually working on new building jobs, declined by 563 to 6,758 as at 31st March, 1952, the equivalent of about 5 per cent.

- (a) Includes estimate for persons working on owner-built jobs.  
 (b) Excludes principals and their employees engaged solely on alterations, additions and maintenance work.

3. NEW HOUSES.

1. NEW HOUSES COMPLETED:

During the quarter ended 31st March, 1952, 705 new houses were completed in Tasmania. This represents a decrease of 631 or 47 per cent compared with the December quarter, 1951, and is the lowest number of completions recorded since the last quarter of 1949.

The number of completions in the March quarter in preceding years were 966 in 1951; 772 in 1950; 589 in 1949; 383 in 1948, 270 in 1947 and 119 in 1946. In the post-war period (September quarter, 1945, to March quarter, 1952), a total of 15,258 new houses has been completed in the State.

In addition to houses 9 new dwellings were provided during the quarter by the construction of flats and shops with dwellings.

The 705 houses completed during the March quarter, 1952, comprised 105 solid brick, concrete etc., 63 brick, concrete etc. veneer, 380 wood, 93 prefabricated wood, 61 fibro-cement and 3 other types of houses. Of the 15,258 houses completed since September, 1945, 3,734 or 24.5% were of brick, concrete etc. construction and 11,524 or 75.5% of wood, etc. materials. For March quarter, 1952, 168 or 23.8% of the total number of houses completed were of brick etc. and 537 or 76.2% of wood etc. materials.

The average recorded value of each house completed in Tasmania has risen at the following rate, viz. £983 in March quarter, 1946, £1,037 in the same quarter of 1947, £1,175 in 1948, £1,316 in 1949, £1,460 in 1950, £1,791 in 1951, and in 1952 the average value was £2,155. For March quarter, 1952, the average completed value of each house of brick, concrete etc. was £3,030 compared with £1,915 for each house of wood and £1,625 for each fibro-cement house. The corresponding average values for March quarter, 1951, were brick etc. £2,467, wood £1,570 and fibro-cement etc. £1,235.

2. NEW HOUSES COMMENCED:

The number of new houses commenced during the March quarter, 1952, was 787. This is 229 or 22 per cent fewer than in the December quarter, 1951, and is the lowest number of commencements recorded since December quarter, 1948.

Since July, 1945, a total of 18,556 new houses has been placed under construction in Tasmania.

### 3. NEW HOUSES UNDER CONSTRUCTION:

The number of houses under construction at 31st March, 1952, was 3,346, an increase of 82 over the number at 31st December, 1951. Corresponding figures as at 31st March of previous years are as follows:- 1951 - 3,512; 1950 - 3,148; 1949 - 2,346; 1948 - 2,010; 1947 - 1,346 and 1946 - 778.

The houses under construction at 31st March, 1952, were distributed according to materials of outer walls as follows - Solid brick, concrete etc. - 763 (22.8%); brick, concrete etc. veneer - 389 (11.6%); wood - 1,720 (51.4%); prefabricated wood - 289 (8.7%); fibro-cement - 183 (5.4%); and others - 2 (0.1%).

The following table shows in summary form, the number of houses commenced, completed and under construction for the years 1945-46 to 1950-51 and by quarters since 1949-50.

#### NEW HOUSES - TASMANIA.

Dec. " (a)	24.3	(a) 67.6	8.1	(a) 33.9	(a) 60.7	(a) 5.4	2,672	(d) 1,836	1,252
Mar. "	23.8	67.1	9.1	34.4	60.1	5.5	3,030	1,915	1,625

- (a) Includes Stone, Concrete and Veneers. (b) Fibro-Cement and Other.  
(c) Average value is obtained by dividing total number of houses completed into the total value of houses completed as stated by builders. As averages, they relate to houses of the size and standard completed in the relevant period, and cannot be regarded as an index of the cost of erecting houses of a particular size or standard.  
(d) Revised.

4. NEW HOUSES ACCORDING TO MUNICIPALITIES:

Particulars of building permits issued for houses, and the number and values of houses commenced, completed and under construction, according to local government areas, are shown for March quarter, 1952, in the next two tables -

A. SUMMARY: BUILDING PERMITS GRANTED AND CONSTRUCTION OF NEW HOUSES, MARCH QUARTER, 1952.

(a) Value when completed. (b) Country sections only of these municipalities.  
(c) Building permits not issued in these municipalities.

4. NEW BUILDINGS (OTHER THAN HOUSES).

Note: Values quoted exclude the cost of land on which the buildings are erected.

The value of new buildings (other than houses) completed during March quarter, 1952, was £442,000 compared with £675,000 during December quarter, 1951, and £341,000 during March quarter, 1951. Fifteen (15) new factories valued at £292,000 were completed during the quarter.

During the March quarter, 1952, the value of new buildings (other than houses) commenced was £468,000 or £124,000 less than during the December quarter, 1951, and £261,000 less than during the corresponding period in 1951. Construction of eight new factories, valued at £120,000 was commenced during the quarter ended 31st March, 1952.

The value of new buildings (other than houses) under construction at 31st March, 1952, was £5,829,000 which is £416,000 more than at 31st December, 1951, and may be compared with £4,626,000 at 31st March, 1951; £2,810,000 at the same date in 1950; £2,056,000 in 1949; £1,362,000 in 1948; £851,000 in 1947 and £287,000 in 1946. The value of factories under construction at 31st March, 1952, was £1,390,000 or 24% of the total value of all buildings (other than houses), under construction at that date.

The progress made in the construction of new buildings (other than houses) may be seen in the next table.

# 5. VALUE OF ALL BUILDINGS.

The value of all new buildings (including houses) completed in Tasmania during March quarter, 1952, was £1,961,000, a decrease of £1,377,000 compared with December quarter, 1951, and £110,000 less than the March quarter, 1951, figure of £2,071,000. New houses valued at £1,519,000 comprised 77.5% of the total value of completions in March quarter, 1952.

During the quarter, the value of all new buildings commenced was £2,135,000 or £759,000 less than in the December quarter, 1951, and £486,000 less than in the March quarter of 1951.

The value of all new buildings under construction at 31st March, 1952, was £13,424,000 which is £758,000 greater than the value at 31st December, 1951. The corresponding value at 31st March, 1951, was £11,011,000

In comparing these money values, due allowance should be made for increases in building costs.

The following table summarises the value of all new buildings commenced, completed and under construction since 1945.

## VALUE (WHEN COMPLETED) OF ALL NEW BUILDINGS. TASMANIA.

PERIOD	Commenced during Period	Completed during Period	Under Construct- ion at end of Period
	£'000	£'000	£'000

## 6. VALUE OF WORK DONE ON NEW BUILDINGS.

The value of work done on new buildings has been calculated from data collected on builders' returns. According to the information recorded on these returns, the value of work done during March quarter, 1952, on new buildings in Tasmania, was £2,646,000 compared with £3,400,000 for December quarter, 1951, and £3,136,000 for September quarter, 1951. Of the March quarter, 1952, total, £1,924,000 or 72.7% represented value of work done during the quarter in respect of new houses. Hobart and Suburbs accounted for £919,000 or 34.7% of the total value, Launceston and Suburbs for £506,000 or 19.1% and the rest of the State for £1,221,000 or 46.2%.

Details for March quarter, 1952, and a comparative statement showing figures for each quarter since December, 1950, are set out below -

7. PERSONS WORKING ON NEW BUILDINGS.

Note - The figures quoted below include estimates for persons working on owner-built houses, but exclude principals and their employees engaged solely on alterations and additions.

There were 6,758 persons including 1,677 working principals engaged on the construction of new buildings at 31st March, 1952. Of these 3,253 were carpenters by trade, 413 bricklayers and 1,537 builders labourers.

The number of persons engaged at the 31st March each year is as follows:- 1946 - 2,109; 1947 - 3,325; 1948 - 3,979; 1949 - 5,130; 1951 - 6,957 and 1952 - 6,758. Of the latter number 5,019 were working on private contract jobs, 770 on owner-built jobs and 969 on government day labour projects. The returns indicated that 3,677 were working on new houses, 2,031 on other new buildings, 349 on alterations and additions to houses, 394 on alterations and additions to other new buildings and 307 on repair and maintenance work.

Details of the number of workers classified according to type of occupation at 30th June, 1946, and later dates are as follows -

(a) Actually working on jobs.

8. DEFINITIONS OF TERMS USED.

Owner-Builder: For the purpose of this Bulletin, an owner-builder is a person who is actually building his own house or is having his house built under his own direction without the services of a Contractor.

Commenced: A building is regarded as having been commenced when work on foundations has begun. Owing to the difficulty of defining the exact point that this represents in building operations, it is probable that interpretations placed upon it by informants are not entirely uniform.

Completed: A building is regarded as having been completed when the builder has fulfilled the terms of the contract. As with commencements, the interpretations placed upon this definition may vary.

Under Construction: A building remaining uncompleted at the end of a period is regarded as being under construction regardless of whether construction was actively proceeding on that particular date.

Employment: The figures of employment relate to persons actually working on new buildings on a specified day. They include working principals, employees, men working as, or for, sub-contractors and men temporarily laid off on account of weather. In addition, they include some employees engaged on alterations, additions, renovations or repairs to buildings when these jobs are undertaken by a contractor who builds new buildings. The figures include estimates for persons working on owner-built houses.

Values: All values shown exclude the value of land and represent the estimated value of buildings on completion.

All figures in this Bulletin relate to the operations of private contractors, Government Authorities and owner-builders.

Figures relate only to the operations of persons who build New Buildings.

Alterations, additions, renovations and repairs to buildings are excluded, because of the difficulty in obtaining complete lists of persons who engage in these operations.

Figures for houses exclude converted military huts, flats, and shop dwellings. Some houses built on farms are excluded but these do not affect the figures materially.

J. C. STEPHEN,  
Deputy Commonwealth Statistician.

and Statistics,  
T. & G. Building,  
Hobart.

18th June, 1952.

THE HISTORY OF THE UNITED STATES

The first part of the history of the United States is the period from the discovery of the continent by Christopher Columbus in 1492 to the establishment of the first permanent settlements. This period is characterized by the exploration of the continent by Spanish, French, and English explorers, and the establishment of the first permanent settlements by the English in 1607.

The second part of the history of the United States is the period from the establishment of the first permanent settlements to the American Revolution in 1776. This period is characterized by the growth of the colonies, the struggle for independence, and the establishment of the United States as a new nation.

The third part of the history of the United States is the period from the American Revolution to the Civil War in 1861. This period is characterized by the expansion of the United States, the struggle for slavery, and the establishment of the United States as a great power.

The fourth part of the history of the United States is the period from the Civil War to the present. This period is characterized by the Reconstruction era, the Gilded Age, the Progressive Era, and the modern era.

The fifth part of the history of the United States is the period from the present to the future. This period is characterized by the challenges of the future, such as the environment, technology, and global issues.
